

Quick Start Guide:

Setting Up Your My Alliance WiFi App

1 Download the My Alliance WiFi app. You can search either the Apple App Store or Google Play Store for: My Alliance WiFi, then install it on your mobile device.

2 Select "SIGN UP" towards the bottom of the screen.

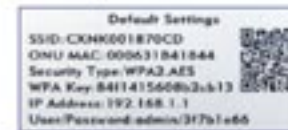

3 Enter your personal information. The password you enter here will be used to access the app.

4 Make sure your Alliance router is plugged in and connected, and then select "Yes" to continue.

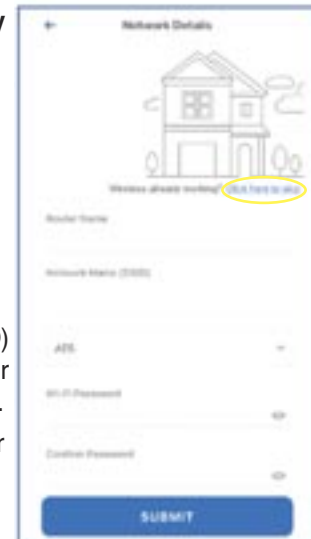

5 Tap the QR code that appears within the app. (You will be asked to allow the app to access your camera.) Point your camera at the QR Code found on the bottom of your Alliance router (example shown below). You might need to remove your router from its stand to see the sticker.

6 **Note: If your router already has a network name and password, tap the "Click here to Skip" text.**

Otherwise, complete these steps to set up your network name and password.

- The Router Name will be used throughout the app.
- The Network Name (SSID) is what you will use as your wireless connection name.
- Select a password for your wireless network. You can use your existing wireless SSID and Password from your current router if you do not want to change them on all the devices in your home.

Getting started with the App

The App allows you to manage your home or small business Wi-Fi network. You can self-install and be managing your home or business within a few minutes. Download the app and start managing your home network today!
